

GraphQL Java and Spring: The Latest Features

Rossen Stoyanchev

@rstoya05

MAY · 30-31 · 2024

DEVELOPER CONFERENCE

SPRINGIO.NET

About me

Spring Framework team

Spring MVC, WebSocket, Messaging, WebFlux, RSocket, Testing

Spring for GraphQL

Started through collaboration with GraphQL Java

Rossen Stoyanchev

About You

Agenda

Spring for GraphQL 1.3

GraphQL Java 22

Collaboration with Netflix DGS

Demo:

<https://github.com/rstoyanchev/spring-graphql-activity>

Spring for GraphQL 1.3

Virtual threads

Blocking `GraphQLClient` with synchronous API

`DgsGraphQLClient` for DGS codegen

Schema inspection of unions, interfaces and arguments

Interface field mapping

Federation Support in Spring for GraphQL 1.3

`FederationSchemaFactory`

Entities query via `@EntityMapping` methods

Batch loading

Demo:

<https://github.com/apollographql/federation-jvm-spring-example>

More in Spring for GraphQL 1.3

SSE transports

WebSocket auth via `connection_init`

WebSocket keep-alive

GraphQL endpoint Jackson codec

Examples Repository:

<https://github.com/spring-projects/spring-graphql-examples>

GraphQL Java 22

Incremental Delivery via @defer

Prioritize data in response

Experimental API

Demo:

<https://github.com/felipe-gdr/spring-graphql-defer>

More in GraphQL Java 22

Performance improvements

Schema diffing tool for change analysis

Built-in DataLoader support (not via instrumentation)

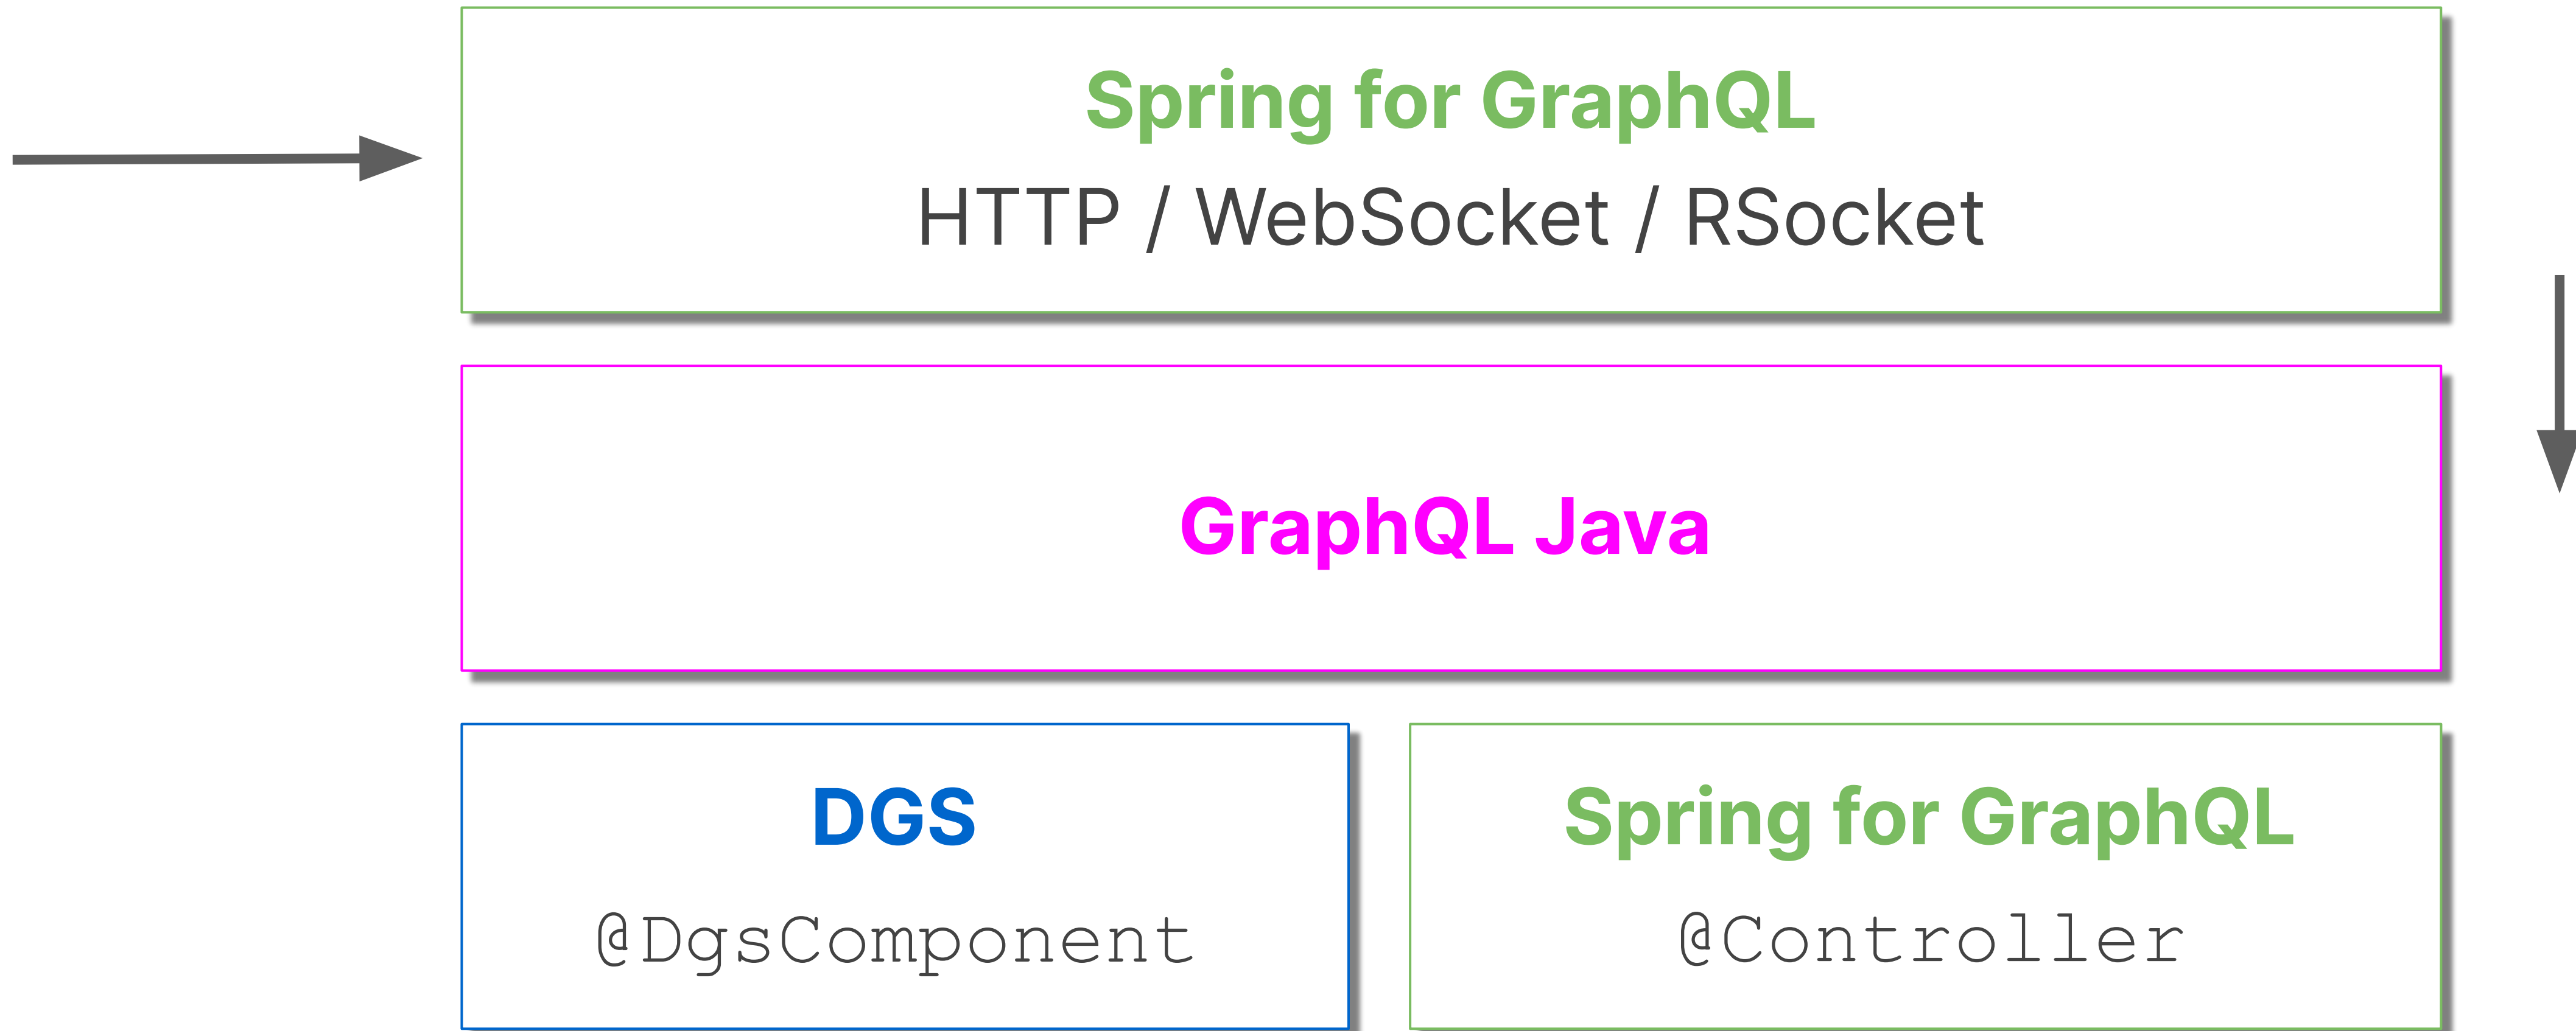

@oneOf directive

DGS Integration with Spring for GraphQL

Common transport and execution foundation

Both programming models

<https://netflix.github.io/dgs/spring-graphql-integration/>

start.spring.io

GraphQL DGS code generation

Netflix DGS

THANKS!!!
